Career Objective

Result-driven Full Stack Developer with hands-on experience in building scalable web applications using Python (Django REST Framework) and JavaScript (React, Next.js). Passionate about optimizing backend logic, enhancing user experience, and delivering high-quality, production-ready software solutions in fast-paced environments.

Technical Skills

Core Expertise: Python, Django REST Framework, JavaScript, React.js, Next.js, HTML, CSS, Tailwind CSS.

Comfortable With: TypeScript, Redux, PostgreSQL, Material UI, Ant Design, Bootstrap.

Familiar With: Node.js, Firebase, MongoDB.

Tools & Technologies: Git, GitHub, Postman, VS Code, Jupyter Notebook, Photoshop.

Problem Solving & Competitive Programming

Total Solved: Over **300+ algorithmic problems** solved across multiple online judges, demonstrating strong analytical and data structure efficiency.

- **Codeforces:** 130+ problems solved ([profile link](#))
- **Virtual Judge:** 110+ problems solved ([profile link](#))
- **Leetcode:** 70+ problems solved ([profile link](#))

Technical Projects

- **Shortfy – URL Shortener** | [\[GitHub Link\]](#) | [\[Live Link\]](#)
 - Designed and deployed a modern URL shortening platform featuring custom short-code creation and secure link redirection.
 - Implemented comprehensive link analytics tracking to provide real-time user insights on dashboard interfaces.
 - Optimized database queries for fast redirection and built a fully responsive, user-friendly frontend dashboard.
 - **Technology Used:** Django REST Framework, Next.js, Tailwind CSS, MySQL
- **Smart Health – AI Patient Diagnosis & Consultation Platform** | [\[GitHub Link\]](#) | [\[Live Link\]](#)
 - Engineered an AI-driven healthcare platform utilizing Machine Learning classification models to predict potential illnesses based on user-selected symptoms.
 - Integrated a real-time live chat consultation module using WebSockets (Django Channels) to seamlessly connect patients with medical consultants.
 - **Technology Used:** Python, Django REST Framework, HTML, CSS, Scikit-learn, Pandas, WebSockets
- **Bank Management System** | [\[GitHub Link\]](#) | [\[Live Link\]](#)
 - Built a secure and reliable banking application supporting core functionalities including account opening, cash deposits, withdrawals, and loan processing.
 - Focused heavily on robust backend architecture, data integrity, and secure transactional operations.
 - **Technology Used:** Django, JavaScript, HTML, CSS, Tailwind CSS, SQL

Professional Courses

CSE Fundamentals with Phitron, Programming Hero (March 2022 – February 2023) | **Certificate**
